EXPERTISE

- GIT
- node.js
- JavaScript
- react.js
- express.js
- mongo-DB
- redux
- socket.io
- firebase
- MVC architecture
- data structure

ALSO USED

- tailwind css
- postman
- figma
- jwt

INTEGRATIONS

- RazorPay
- Cloudinary
- node mailer
- multer

ABOUT ME

Self taught MERN stack developer based in Calicut, Kerala, curious to learn more about developing scalable distributed systems, loves problem solving and cares about writing readable as well as maintainable code.

PROJECTS

- **CONTROL HUB - multi tenant SaaS for HR management**
 - Using this platform, HR can handle and track its day-to-day activities like employees, salary, overtime payments and resources.
 - is built using the **MVC** architecture, which provides a clear separation of concerns between the different components of the application.
 - The whole app is mainly split into 2 parts HR side and client (employee) side, both can connect using chat - real time communication which implemented by **socket.io**. Have a strong attendance verification system using **react-webcam** module.
 - This Project has features like hiring, task, employee, leave, and payroll management, overtime payment management, chat and many more **CRUD** operations.
 - Planned and implemented the whole module with **REST APIS**.

Git Repo:- <https://github.com/nazimameer/controlhub>

Technologies used in the project

- tailwindcss, materail ui, antd, flowbite
- Node, react, express, mongo
- socket.io, cloundinary, multer, react-webcam react-calendar

- **THETOSH - A simple ecommerce store**

- This is a simple ecommerce with features like user management , cart, wishlist, orders, etc.

Git Repo :- <https://github.com/nazimameer/thetosh>

Technologies used in the project

- Html, css, javascript
- Node, express, mongo
- Razorpay, nodemailer

MINI - PROJECTS

- **Netflilx - clone**
