SKILLS

- Git
- React.js
- Express.js
- HTML/CSS
- Express.js
- JAVA
- Tailwind CSS
- Data Structure
- JavaScript
- Node.js
- MonogoDB
- Material-UI
- Firebase
- PostgreSQL
- MVC Architecture

FAMILIAR WITH

- esLint
- Prettier
- Postman
- Figma

INTEGRATIONS

- RazorPay
- Cloudinary
- Nodemailer
- Multer

EDUCATION

MERN STACK DEVELOPMENT
BROTOTYPE
2022 - Present

HIGHER SECONDARY
PVS HSS ERANHIKKAL, KOZHIKODE
2020 - 2022

ABOUT ME

Self-taught MERN Stack Developer, curious to learn more about developing scalable distributed systems, loves problem solving and cares about writing readable as well as maintainable code.

PROJECTS

- **CONTROL HUB - Multi-Tenant SaaS for HR Management**
  - Using this platform, HR can handle and track its day-to-day activities like employees, salary, overtime payments and resources.
  - Built using the **MVC** Architecture, which provides a clear separation of concerns between the different components of the application.
  - The whole app is mainly split into two parts HR side and client (employee) side, both can connect using chat - real time communication which implemented by **Socket.io**. Have a strong attendance verification system using **React-Webcam** module.
  - This Project has features like hiring, task, employee, leave, and payroll management, overtime payment management, chat and many more **CRUD** operations.
  - Planned and implemented the whole module with **REST API**s.
    - **Technologies used in the project**
    - Tailwind CSS, Material-UI, Ant Design, Flowbite
    - Node.js, React.js, Express.js, MongoDB
    - Socket.io, Cloudinary, Multer, React-Webcam, React-Calendar

      [Git Repository](#)

- **THE TOSH - Ecommerce Store**
  - This is a simple ecommerce with features like user management, cart, wishlist, orders, and some basic **CRUD** operations
    - **Technologies used in the project**
    - Html, CSS, JavaScript, Bootstrap, Media Query
    - Node.js, Express.js, MongoDB
    - Razorpay, Nodemailer
